

“For Health”

DeepOhh

DeepOhh is based on a herbal formula enriched with active compound sources developed for the relief of bacterial, viral, fungal infections and chronic problems in the respiratory tract.

It aims to restore impaired airway function and in particular the restoration of bronchopulmonary tissue.

Recommended in the following cases;

Increasing the functional ability of lung tissue neutralize sources of infection penetrating the alveoli,

Facilitating breathing by maintaining humidity in the lungs and bronchi, accelerating the transport of oxygen and CO₂ from the alveoli,

Prevention of pulmonary tissue thrombosis during inflammatory processes of infectious and non-infectious factors,

Activation of microcirculation in lung capillaries,

Normalization/enhancement of the expansion capacity of the lungs,
prevention of pulmonary spasms,

Activation of immune cells and neutralization of sources of infection,

In bacterial infections, initiating the processes of dissolution of the membrane protein structure of bacterial cells and preventing the spread of infection,

Reducing the frequency and severity of asthma attacks,

Normalization of mucus production,

Reducing cilia damage and increasing their mobility/vitality,

Reduction of inflammatory effects; cough, shortness of breath, chest pain, sputum production, fever and obstructions,

Prevention of idiopathic inflammatory manifestations of lung and bronchial tissue and concomitant fibrosis,

Elimination of complications and side effects of vaccines on the function and condition of the cardiovascular and endocrine systems,

Improvement of vascular microcirculation and hemorheology,
elimination of problems caused by blood pressure disorders,
Elimination of vascular and capillary tone and permeability disorders,
Elimination of damage caused by blood viscosity and accumulation of metabolic products,
Reduction of smoking-related and miscellaneous lower respiratory tract obstructions.

Directions for use: Drink 1 sachet 2 times a day, in the morning and in the evening, with 200 ml of water at 85-90 ⁽⁰⁾ C for 5-6 minutes. Jerusalem artichoke syrup is recommended as a sweetener.

Cure duration is 28 days. Depending on the prognosis, it can be repeated 2-3 times consecutively under physician control.

It is not addictive when used for a long time, its effectiveness does not decrease and it has no toxicity. No teratogenic effect.

Biogenic content: it is an unmodified natural formula. Its taste and color are not adjusted by synthetic flavors and substances.

Bioactive substances, vitamins, minerals are in natural, digestible form. Therefore the taste is natural and unique. It contains no synthetic chemicals, genetically modified substances, hormones, preservatives.

Important note : Do not discontinue your current medical treatment (if any). The product content is recommended as a complement/supplement to medical treatment, not as an alternative. In case of clinical and laboratory improvements that may develop with the process of using the product, consult your physician for adjusting the dose of drugs in your current medical treatment, the need for drug reduction and similar situations.

WARNINGS / PRECAUTIONS

- 1) Individuals with allergy and/or sensitivity to product components should not use.
- 2) Individuals who are in pregnancy and breastfeeding periods or who take regular medication should definitely consume under the supervision of a physician.
- 3) Not suitable for consumption under 14 years of age.
- 4) It should be consumed before the recommended consumption date. The recommended expiry date (TETT and batch number) is printed on the packaging. Products with damaged packaging should not be purchased.
- 5) Unpackaged products should be stored in places out of direct sunlight at a temperature range of 10 °C - 25 °C, away from moisture. Children should be prevented from accessing the products.

PRODUCT INFORMATION

- 1) Species identification, DNA quality, cultivation, harvesting, drying and storage rules/conditions of the raw material plants used in our products are the basic components of our quality and effectiveness.
- 2) In our products; additives, ropes, adhesives, adhesives, colorants, preservatives, sweeteners, synthetic flavors, agricultural pollutants, etc. no synthetic chemical content is used.
- 3) Our products are produced and offered for sale with the permission of the Republic of Turkey Ministry of Agriculture and Forestry dated 12.12.2022 and numbered TR-16-K-057567.

Content:

<i>Althaea officinalis</i> (L.)	Marshmallow flower
<i>Marrubium vulgare</i> (L.)	Grey grass, Karaderme
<i>Pulmonaria mollis</i> Hornem. / <i>angustifolia</i> / <i>officinalis</i>	Liverwort
<i>Malva thuringiaca</i> / <i>Lavatera thuringiaca</i>	Garden arborvitae, Highland Wrapper
<i>Plantago major</i> (L.)	Nerve grass
<i>Verbascum thapsus</i> (L.)	Motherwort
<i>Astragalus membranaceus</i> (Fisch.) Bunge / <i>propinquus</i> / <i>mongolicus</i>	Gooseberry, Chinese ryegrass
<i>Agastache rugosa</i> (Fisch.&C.A.Mey) Kuntze	Korean mint
<i>Hyssopus officinalis</i> (L.)	Zufa grass
<i>Symphytum officinale</i> (L.)	Comfrey
<i>Althea rosea</i> Cav. / <i>Alcea rosea</i> (L.)	Hollyhock
