**FatOFF**

**The effect of the FatOff blend;** This blend provides emulsification of fats ingested through food and activation of the action of lipases on fats. At the same time, it promotes the regulation of ATP synthesis in mitochondria simultaneously with the subsequent complete consumption of lipids in the body and their transition to specific digestible forms. This contributes to the stimulation of metabolic rate.

The simultaneous similar effect of the mixture on carbohydrate metabolism facilitates the breakdown of lipids and prevents their accumulation.

**It is recommended in the following cases:**

Foods provided oils cell warehouses big proportion with the accumulation together in pathological processes of lipid metabolism;

When consuming unreasonable amounts of animal fats and carbohydrates during the day; In obesity and morbid obesity;

Lack of physical activity with a sedentary and inefficient lifestyle; Stressful overeating;

Regular deficiency of vitamin A and the B vitamin group, which leads to impaired fat metabolism;

Irrational in quantity carbohydrate while consuming deteriorating oil metabolism when it needs to be regulated;

In reducing increased oxidative stress due to dietary habits;

Contribute to eliminating the individual causes of disorders of fat metabolism and the need to reduce the increased formation of adipocytes (fat cells);

Reduction of adipocytes of existing subcutaneous tissue and internal organs;

**The mechanism of action of biogenic content directly supports the following:**

Increasing cell energy metabolism and dissolving adipose tissue during the day based on the principles of the formation of natural individual processes of burning fat cells,

Regulation of digestive enzymes and prevention of the formation of fat cells,

Increase the activity of liver enzymes during digestion and normalize lipid, carbohydrate metabolism;

Improving the composition of the intestinal microflora and optimizing the processes of absorption of nutrients,

Reducing the accumulation of subcutaneous fat and increasing the dissolution activity of adipocytes (fat cells) at night,

Normalization of body mass index;

Regulating carbohydrate metabolism and reducing the formation of fat cells, increasing calcium absorption from food,

Increasing physical and mental abilities,

Increasing the activity of liver enzymes responsible for lipid, protein and carbohydrate metabolism.

**The biogenic mixture** also indirectly supports the following processes when consumed regularly and dosed. It has an additional regulatory, normalizing effect on the disturbances that occur in organs and systems in relation to the imbalance in lipid and carbohydrate metabolism:

Restoration of the sensitivity of tissue cells to insulin, which is reduced by the excess fat layer in the organs, causing excessive glucose levels in the blood,

Normalization of vascular tone, prevention of venous pathology, regulation of blood pressure according to individual performance indicators,

Reduction of atherosclerotic formations in the arteries of the head and neck and cardiac vessels and elimination of the conditions that may develop due to them;

Improvement of vascular tone of the gastrointestinal tract,

Improvement of blood rheology,

Regulation of low density lipoprotein synthesis, Prevention of excess cholesterol levels

**Directions for use:** Drink 1 sachet 2 times a day, in the morning and in the evening, with 200 ml of water at 85-90 <sup>(0)</sup>C for 5-6 minutes. Jerusalem artichoke syrup is recommended as a sweetener.

**Cure duration is 28 days. Depending on the prognosis, it can be repeated 2-3 times consecutively under physician control.**

It is not addictive when used for a long time, its effectiveness does not decrease and it has no toxicity. No teratogenic effect.

**Biogenic content;** it is an unmodified natural formula. Its taste and color are not adjusted by synthetic flavors and substances.

Bioactive substances, vitamins, minerals are in natural, digestible form. Therefore the taste is natural and unique. It contains no synthetic chemicals, genetically modified substances, hormones, preservatives.

**Important note :** Do not discontinue your current medical treatment (if any). The product content is recommended as a complement/supplement to medical treatment, not as an alternative. In case of clinical and laboratory improvements that may develop with the process of using the product, consult your physician for adjusting the dose of drugs in your current medical treatment, the need for drug reduction and similar situations.

#### **WARNINGS / PRECAUTIONS**

- 1) Individuals with allergy and/or sensitivity to product components should not use.
- 2) Individuals who are in pregnancy and breastfeeding periods or who take regular medication should definitely consume under the supervision of a physician.
- 3) Not suitable for consumption under 14 years of age.
- 4) It should be consumed before the recommended consumption date. The recommended expiry date (TETT and batch number) is printed on the packaging. Products with damaged packaging should not be purchased.
- 5) Unpackaged products should be stored in places out of direct sunlight at a temperature range of 10 <sup>0</sup>C - 25 <sup>0</sup>C, away from moisture. Children should be prevented from accessing the products.

## PRODUCT INFORMATION

- 1) Species identification, DNA quality, cultivation, harvesting, drying and storage rules/conditions of the raw material plants used in our products are the basic components of our quality and effectiveness.
- 2) In our products; additives, ropes, adhesives, adhesives, colorants, preservatives, sweeteners, synthetic flavors, agricultural pollutants, etc. no synthetic chemical content is used.
- 3) Our products are produced and offered for sale with the permission of the Republic of Turkey Ministry of Agriculture and Forestry dated 12.12.2022 and numbered TR-16-K-057567.

### Content:

<i>Citrus aurantium</i> var. <i>amara</i> (L.)	Turunc
<i>Schisandra chinensis</i> Turcz. (Baill.)	Schizandra grape
<i>Equisetum arvense</i> (L.) / <i>hyemale</i> / <i>telmateia</i>	Horsetail, Horsetail herb
<i>Artemisia dracunculus</i> (L.) / <i>absinthium</i> / <i>abrotanum</i>	Tarragon / Wormwood / Black wormwood
<i>Rhus coriaria</i> (L.)	Sumac
<i>Ilex paraguariensis</i> A.St.-Hil.	Yerba mate
<i>Trigonella foenum-graecum</i> (L.)	Fenugreek
<i>Epilobium angustifolium</i> (L.) / <i>Chamaenerion angustifolium</i>	Ragweed, Pasture rose
<i>Fucus vesiculosus</i> (L.)	Brown Seaweed
<i>Carica papaya</i> (L.)	Papaya
<i>Moringa oleifera</i> Lam.	Moringa
<i>Bidens tripartita</i> (L.)	Water flax
<i>Rubus idaeus</i> (L.)	Raspberry
<i>Aspalathus linearis</i> (Burm.f.) R.Dahlgren	Rooibos
<i>Cichorium intybus</i> (L.)	Chicory, White chicory, Blue chicory
<i>Althaea officinalis</i> (L.)	Marshmallow flower
<i>Hibiscus sabdariffa</i> (L.)	Kerkede, Karkade
<i>Coriandrum sativum</i> (L.)	Coriander
<i>Silybum Marianum</i> (L.) Gaertn.	Marjoram thistle, Thistle, Gengel
<i>Rosa canina</i> (L.)	Rosehip
