

“For Health”

NormoTree

NormoTree is a unique, highly bioavailable natural blend that restores tissue integrity and elasticity in order to eliminate arterial and venous circulatory disorders caused by inefficient lifestyle, irregular and unhealthy diet, obesity, etc.

The main objective of this content is support the fight against chronic inflammation.

It pursues a mechanism of action aimed at eliminating vascular inflammation, preserving and improving vascular elasticity, tissue permeability and tissue integrity.

When using NormoTree, an anti-inflammatory diet should be followed and it is recommended to include ginger, turmeric, garlic, cabbage and fibrous fruits and vegetables in daily consumption. Avoiding processed food products, alcohol, smoking, fast food, fried foods, delicatessen products, trans fats, pastries such as white bread contributes to treatment.

When the following conditions need to be remedied;

Chronic hypertension and blood pressure disorders,

Impaired tone and permeability of arterial and venous

capillaries, atherosclerotic disorders, vasculitis,

Disruption of lymphokinetic activity,

Chronic venous insufficiency, chronic lymphovenous insufficiency of the

lower extremities, increased edema, thrombophlebitis, deep vein

thrombosis,

Cellular resistance to insulin and grade 1 and 2 hyperglycemia with concomitant disorders of the cardiovascular system,

Cerebrovascular circulatory disorders, Cerebral hypoxia,

Impaired memory, impaired mental activity,

Loss of physical stamina and performance,

Loss of sexual performance, erectile dysfunction,

impaired eye function, decreased vision,

Decreased immune response, chronic vascular inflammatory processes of viral, bacterial, fungal, parasitic factors,

Increased allergic reactions,

Skin inflammations, hair and nail pathologies, formation of spider veins on the skin, striae,

reduced adaptive abilities,

Obesity and systemic chronic processes caused by morbid obesity,

processes in which oxidative stress increases,

Increased headaches etc.

Directions for use: Drink 1 sachet 2 times a day, in the morning and in the evening, with 200 ml of water at 85-90 (°)C for 5-6 minutes. Jerusalem artichoke syrup is recommended as a sweetener.

Cure duration is 28 days. Depending on the prognosis, it can be repeated 2-3 times consecutively under physician control.

It is not addictive when used for a long time, its effectiveness does not decrease and it has no

toxicity. No teratogenic effect.

Biogenic content; it is an unmodified natural formula. Its taste and color are not adjusted by synthetic flavors and substances.

Bioactive substances, vitamins, minerals are in natural, digestible form. Therefore the taste is natural and unique. It contains no synthetic chemicals, genetically modified substances, hormones, preservatives.

Important note : Do not discontinue your current medical treatment (if any). The product content is recommended as a complement/supplement to medical treatment, not as an alternative. In case of clinical and laboratory improvements that may develop with the process of using the product, consult your physician for adjusting the dose of drugs in your current medical treatment, the need for drug reduction and similar situations.

WARNINGS / PRECAUTIONS

- 1) Individuals with allergy and/or sensitivity to product components should not use.
- 2) Individuals who are in pregnancy and breastfeeding periods or who take regular medication should definitely consume under the supervision of a physician.
- 3) Not suitable for consumption under 14 years of age.
- 4) It should be consumed before the recommended consumption date. The recommended expiry date (TETT and batch number) is printed on the packaging. Products with damaged packaging should not be purchased.
- 5) Unpackaged products should be stored in places out of direct sunlight at a temperature range of 10 °C - 25 °C, away from moisture. Children should be prevented from accessing the products.

PRODUCT INFORMATION

- 1) Species identification, DNA quality, cultivation, harvesting, drying and storage rules/conditions of the raw material plants used in our products are the basic components of our quality and effectiveness.
- 2) In our products; additives, ropes, adhesives, adhesives, colorants, preservatives, sweeteners, synthetic flavors, agricultural pollutants, etc. no synthetic chemical content is used.
- 3) Our products are produced and offered for sale with the permission of the Republic of Turkey Ministry of Agriculture and Forestry dated 12.12.2022 and numbered TR-16-K-057567.

Content:

<i>Crataegus monogyna</i> Jacq. / <i>azarolus</i> (L.)	Hawthorn, Yemişen / Müzmüldek
<i>Astragalus membranaceus</i> (Fisch.) Bunge / <i>propinquus</i>	Chinese ryegrass, Chinese ryegrass
