RedForce is a unique, highly bioavailable natural blend developed to support the repair of tissues whose health deteriorates as a result of conditions such as systemic chronic diseases, high blood sugar levels, overweight, autoimmune disorders, exposure to toxins, untreated inflammation, intense and persistent mental stress, excessive alcohol consumption, irregular and processed food-based malnutrition, sedentary and ineffective life, high oxidative stress.

The main goal of this ingredient is the restoration of tissues that have been damaged for various reasons, detoxification and the creation of very healthy blood cells.

When using RedForce, an anti-inflammatory diet should be followed and it is recommended to include ginger, turmeric, garlic, cabbage and fibrous fruits and vegetables in daily consumption. Avoiding processed food products, alcohol, smoking, fast food, fried foods, delicatessen products, trans fats and pastries such as white bread contributes to treatment.

RedForce directly targets the following benefits:

DNA methylation healthy and helping to prevent hereditary changes, Normalizing blood composition, preventing the formation of malignant blood cells,

Reducing autoimmune changes and attacks,

Prevent or reduce allergy manifestations and attacks,

Preserve telomere quality,

Slowing down the aging process,

Reduce the effects of andropause and menopause,

prevent degenerative changes of the prostate,

Prevent mutations and changes in cell DNA, cell degeneration and reduce changes in tumor processes,

Increasing the endurance of all blood cells, their production,

Maintaining tissue oxygenation, respiratory gas saturations at ideal levels, regulating the function and condition of the thyroid gland,

Relieving symptoms of iron deficiency anemia and accompanying anemia,
Improving menstrual symptoms,
Eliminating degenerative changes in the skin (dryness, peeling, cracks), restoring
hair and nail health,
Removing the appearance of pallor,
Reducing physical and mental performance, fatigue, weakness, eliminating muscle
weakness, improving tone,
with weight control,
